Instructor Information and Office hours

Mostafa Taha
Email: mtaha@sce.carleton.ca
Office Hours: Wednesdays 11:30 am – 1:00 pm, Office: ME4436

TA Information and Office hours

- To be determined and posted on cuLearn.

Calendar Information

- Course Number: SYSC4805
- Course Title: Computer Systems Design Lab
- Calendar description: Project-oriented experience in the design of embedded computer systems. Lectures will discuss practical aspects related to the design and development of embedded systems, starting from sensor data acquisition and processing to decision systems, testing and embedded-system based project management, with practical application examples. Includes: Experiential Learning Activity.

Prerequisites

- Prerequisite(s): SYSC 3320 or SYSC 3601.
- Students who have not satisfied the prerequisites for this course must either withdraw from the course or obtain a prerequisite waiver by visiting the Engineering Undergraduate Academic Support Office.

Assumed Knowledge

Upon entry into this course, students are expected to have knowledge of Programming in C and basic I/O interfacing.

Course Objectives

This course builds on the existing knowledge about software and hardware interfacing, software modeling and software development process, systems development processes and testing, acquired during the program. It aims at enhancing the technical knowledge in the field of computer engineering by the use of various sensors, performing data fusion, and programming a
microcontroller to acquire, process the data and make decisions based on it, with a practical application in mobile robots. It also aims at developing soft skills for the future engineers ready to embark in their careers by cultivating team work skills and entrepreneurial spirit. The goal is to develop a deeper understanding of the multifaceted process of managing and developing engineering projects.

**Learning Outcomes**

At the end of this course, students will be able to:

1. Define concepts of product design, development methodology and team-based (small) project management
2. Design an embedded microcontroller-based system for an engineering problem involving hardware and software components.
3. Identify and adapt to realistic constraints.
4. Analyze potential solutions for an engineering project.
5. Use appropriate knowledge and skills to formulate, analyze and solve an engineering problem.
6. Apply scientific methods to evaluate and predict performance.
7. Define, plan and manage a moderately complex project.
8. Develop team work and entrepreneurial skills.
9. Develop communications skills through technical presentations and reports.

**Graduate Attributes (GA’s)**

The Canadian Engineering Accreditation Board requires graduates of engineering programs to possess 12 attributes at the time of graduation. Activities related to the learning outcomes listed above are measured throughout the course and are part of the department’s continual improvement process. Graduate attribute measurements will not be taken into consideration in determining a student’s grade in the course. For more information, please visit: [https://engineerscanada.ca/](https://engineerscanada.ca/).
Graduate Attribute | Learning Outcome (s) |
---|---|
1.5 S Knowledge Base: Computer systems | 1-2 |
1.8 S Knowledge Base: Software engineering | 1-2 |
2.2 Problem Analysis: Approach to the problem | 3-5 |
4.4 Design: Design solution(s) | 3-6 |
4.5 Design: Design implementation / task(s) definition | 3-6 |
6.2 Individual and Team Work: Group culture, group dynamics | 7-8 |
7.3 Communication Skills: Oral and written presentations | 9 |
7.4 Communication Skills: Technical reading | 9 |

Textbooks (or other resources)

- No textbook is required for this course. Course materials and other instructional materials will be posted on the course web page through cuLearn. Students are expected to check this page frequently.
- All course material and instructional materials are covered by the rules stipulated in Copyright on Course Materials of General Regulations section below.
- **Recommended Additional Reading:**
- **Links to Software, libraries, additional resources:** Instructions for download software libraries as well as a brief description of its use will be provided as part of the course material in cuLearn.

Evaluation and Grading Scheme

The course work will be evaluated as follows:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
<th>Evaluation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project proposal</td>
<td>10%</td>
<td>Team mark</td>
</tr>
<tr>
<td>Project progress report</td>
<td>10%</td>
<td>Team mark</td>
</tr>
<tr>
<td>Final project presentation</td>
<td>10%</td>
<td>Team mark</td>
</tr>
<tr>
<td>Final project demonstration</td>
<td>15%</td>
<td>Team mark</td>
</tr>
<tr>
<td>Final report</td>
<td>20%</td>
<td>Team mark</td>
</tr>
<tr>
<td>Quiz</td>
<td>10%</td>
<td>Individual mark</td>
</tr>
<tr>
<td>Peer review of individual contributions</td>
<td>10%</td>
<td>Individual mark</td>
</tr>
<tr>
<td>Individual project contributions</td>
<td>15%</td>
<td>Individual mark</td>

</table>
Breakdown of course requirements

Lectures & quiz:

- There is one two-hour lecture per week. During the first part of the term, lectures will cover issues related to design and development of microcontroller-based sensor systems, mobile robotics and project management. During the last part of the term, lectures will serve for student project presentations.

- The course will contain a quiz. A make-up quiz can be granted based on a valid medical certificate. The medical certificate must adhere to the format required by the Registrar. The format is available through the Registrar’s website [http://www.carleton.ca/registrar/forms](http://www.carleton.ca/registrar/forms).

Labs:

- There is one three-hour lab period per week. Full attendance to labs is mandatory and will be monitored throughout the term.

- The computer labs for this course are located in Canal Bldg Room 5109 and Mackenzie Building Room 3475. The labs are open 7 days a week, whenever the building is open. Except for those timetable slots when the room is reserved for specific courses, the lab can be used any time.

- During the first labs, the students will prepare the project planning and work on a series of guided exercises. During subsequent lab sessions, the students will work on their project: select their sensor system, learn how to perform data acquisition from various sensors, design their solution, work on their project specific tasks and conduct demo sessions by teams.

- Each team is expected to demonstrate the lab exercises and the project milestones.

Project:

A major component of the course is a team-based project. Each team will consist of 3 students. The project must be related to a computer system design for a mobile robot application. The target of the application is the choice of each team. A small mobile robot kit and components will be provided for each team. Each team will add two to three sensors of different types at their choice to the robot kit in order to meet the project target. Each team is responsible for proposing a solution to a practical robot task and for planning and delivering a workable prototype. Each member of the team is expected to participate in all aspects of project planning, management and the design and development of the technical solution. The final grade will
take into consideration team functioning aspects, the individual contributions, the quality of the project and of the submitted documents. For more details on the project, consult the document Project specification, available in CULearn.

Week-by-Week breakdown (tentative)

1. Introduction.
2. Design and development of embedded systems with microcontrollers.
3. Team-based project management.
7. Students presentations (5 weeks)

General Regulations

Attendance: Students are expected to attend all lectures and lab periods. The University requires students to have a conflict-free timetable. For more information, see the current Undergraduate Calendar, Academic Regulations of the University, Section 2.1.3, Course Selection and Registration and Section 2.1.7, Deregistration.

Health and Safety: Every student should have a copy of our Health and Safety Manual. A PDF copy of this manual is available online: http://sce.carleton.ca/courses/health-and-safety.pdf

Deferred Term Work: Students who claim illness, injury or other extraordinary circumstances beyond their control as a reason for missed term work are held responsible for immediately informing the instructor concerned and for making alternate arrangements with the instructor and in all cases this must occur no later than three (3.0) working days after the term work was due. The alternate arrangement must be made before the last day of classes in the term as published in the academic schedule. For more information, see the current Undergraduate Calendar, Academic Regulations of the University, Section 4.4, Deferred Term Work.

Appeal of Grades: The processes for dealing with questions or concerns regarding grades assigned during the term and final grades is described in the Undergraduate Calendar, Academic Regulations of the University,
Section 3.3.4, Informal Appeal of Grade and Section 3.3.5 Formal Appeal of Grade.

**Academic Integrity:** Students should be aware of their obligations with regards to academic integrity. Please review the information about academic integrity at: [https://carleton.ca/registrar/academic-integrity/](https://carleton.ca/registrar/academic-integrity/). This site also contains a link to the complete Academic Integrity Policy that was approved by the University's Senate.

**Plagiarism:** Plagiarism (copying and handing in for credit someone else's work) is a serious instructional offense that will not be tolerated.

**Academic Accommodation:** You may need special arrangements to meet your academic obligations during the term. You can visit the Equity Services website to view the policies and to obtain more detailed information on academic accommodation at [http://www.carleton.ca/equity/](http://www.carleton.ca/equity/) For an accommodation request, the processes are as follows:

- **Pregnancy or Religious obligation:** Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details see [https://carleton.ca/equity/wp-content/uploads/Student-Guide-to-Academic-Accommodation.pdf](https://carleton.ca/equity/wp-content/uploads/Student-Guide-to-Academic-Accommodation.pdf)

- **Academic Accommodations for Students with Disabilities:** The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send me your **Letter of Accommodation** at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). **Requests made within two weeks will be reviewed on a case-by-case basis.** After requesting accommodation from PMC, meet with me to ensure accommodation arrangements are made. Please consult the PMC website ([www.carleton.ca/pmc](http://www.carleton.ca/pmc)) for the deadline to request accommodations for the formally-scheduled exam (if applicable).
- **Survivors of Sexual Violence:** As a community, Carleton University is committed to maintaining a positive learning, working and living environment where sexual violence will not be tolerated, and where survivors are supported through academic accommodations as per Carleton’s Sexual Violence Policy. For more information about the services available at the university and to obtain information about sexual violence and/or support, visit: https://carleton.ca/sexual-violence-support/.

- **Accommodation for Student Activities:** Carleton University recognizes the substantial benefits, both to the individual student and for the university, that result from a student participating in activities beyond the classroom experience. Reasonable accommodation must be provided to students who compete or perform at the national or international level. Please contact your instructor with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details, see https://carleton.ca/senate/wp-content/uploads/Accommodation-for-Student-Activities-1.pdf

**Copyright on Course Materials:** The materials created for this course (including the course outline and any slides, posted notes, labs, project, assignments, quizzes, exams and solutions) are intended for personal use and may not be reproduced or redistributed or posted on any web site without prior written permission from the author(s).
